i. LEG STRENGTH

- Leg Strength should be performed on a daily basis after General Warmup
- This circuit is a conditioning program for legs not a strength building program
- It is also important as a part of the injury prevention program
- Leg Strength can be performed individually or as a group activity (preferred)
- It is important that the exercises are performed with correct technique & quality

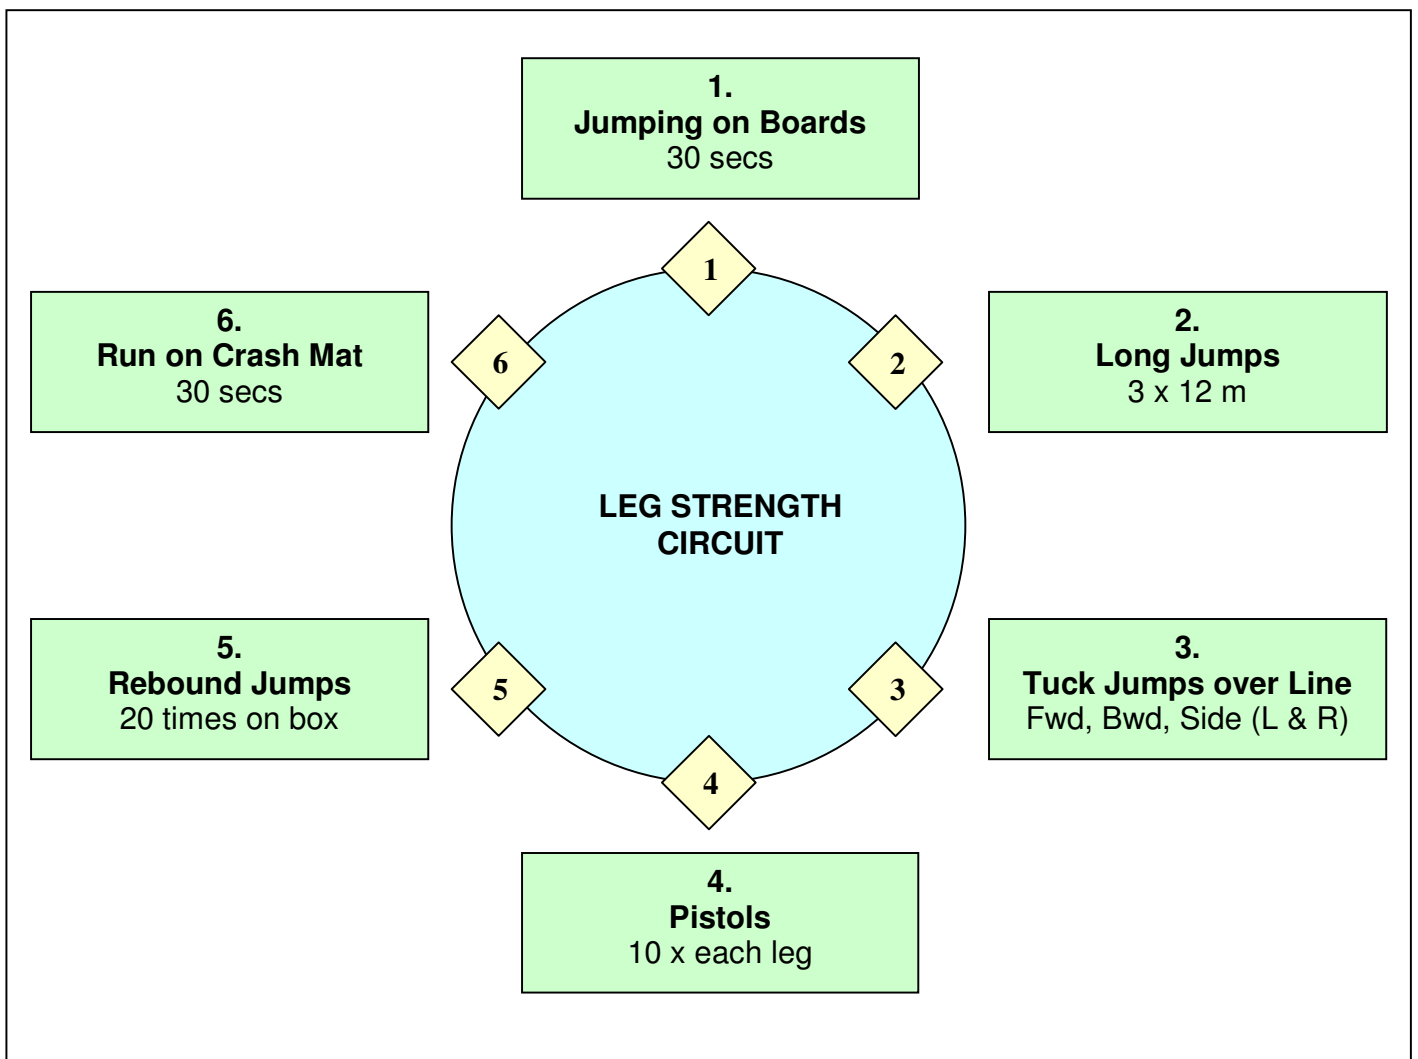

Diagram: Leg Strength Circuit

DESCRIPTION OF LEG STRENGTH ACTIVITIES

1. Jumping on Boards (30 secs)

- Stride jumps are performed on beat boards placed at approximately 45° angle
- Straddle jumps can be performed as a variation

2. Long Jumps (3 x 12m)

- Long jumps are performed across the Floor Area
- Each jump is performed with full extension (similar to hurdle)
- Jumps should be performed with full arm swing & hip extension; fingers & toes pointed
- Arms circle backward at the completion of each jump in readiness for the next jump

3. Tuck Jumps over Line (4 x lines – one per activity)

- Long jumps are performed across lines on the Floor Area
- Forward – Tuck Jumps performed side to side across the line facing forward
- Backward – Tuck Jumps performed side to side across the line facing backward
- Lateral – Tuck Jumps performed fwd & bwd across the line facing sideways (left & right)
- Tuck Jumps must be performed with high knees, knees together & toes pointed

4. Pistols (10 x Single Leg Squats on each leg)

- Pistols can be performed in a number of different ways depending on individual needs:
 - Using the PB uprights for balance
 - Without support on the floor
 - On a bench or beam to enable a deeper squat

5. Rebound Jumps (20 x using bench or box)

- Rebound Jumps should be performed with tight body & correct arm action
- Arms should rise actively on takeoff & pull down as the feet approach the bench
- The arms pull down to just above shoulder height & slightly sideways
- The arms then rise again on the drop in readiness for the Rebound Jump
- Arms should be straight & strong with fingers stretched at all times

6. Running on Crash Mat (30 secs)

- Running on a crash mat with consistent effort for 30 secs

ii. PRE-STRENGTH

- The purpose of pre-strength is to prepare the body for technical strength activities
- The following exercises are suggested for the Pre-Strength Circuit:
 - **V Snaps** – 10 fast V Snaps + 5 secs hold hollow shape + hollow rocking x 5
 - **Hip Extension** – 10 Extensions + 5 secs hold arch shape + arch rocking x 5
 - **Pushups** – 5 x normal + 5 x wide + 5 x narrow + 5 x fwd + 5 x bwd
 - **Handstand Walk** – 12m with straight arms & straight body

viii. BASIC TUMBLING

- **Roll Sequence** (Preferable to perform all turns with hop)
 - Kick to Hstd, Roll Fwd – Push to Hstd, ½ turn – Bwd Roll to Hstd – Bwd Roll 1/1 turn to Hstd – Bwd Roll ½ turn to Hstd – Fwd Roll through straddle L to Hstd – ½ turn
- **Handspring Step Out & Handspring Step Out with Change Legs**
- **Hurdle (from stand) Handspring Step Out (x3) to Handspring (legs together)**
- **Hurdle (from stand) Handspring to Flyspring (3-4 times)**
- **Hurdle (from stand) Handspring Step Out, Handspring, Flyspring, Layout Front**
- **Punch Front Salto (4-5 times in a row)**
- **Layout Front from run (3-4 times in a row)**
- **Hurdle (from stand) to Roundoff, Flic (4-5 times in a row)**
- **Roundoff Whip Back (x 3 in a row)**
- **3 steps Roundoff, Flic, Tucked Back Salto kick out (stick landing)**
- **3 steps Roundoff, Flic, Piked Back Salto kick out (stick landing)**
- **3 steps Roundoff, Flic, Stretched Back Salto (stick landing)**
- **3 steps Roundoff, Flic, Tucked Double Back Salto (stick landing)**

ix. BASIC ROUTINES

• FLOOR

- See Basic Tumbling (item viii)

• POMMELS

- **Scissor Sequence:**
 - Single Leg Swings – Stride Swings – False Scissors – 5 Scissors
- **Basic Sequence:**
 - 3 Scissors – 3 Circles on Handles – Travel Down – 3 Downhill Circles – $\frac{1}{4}$ turn – 3 Loops – $\frac{1}{4}$ turn – 3 Uphill Circles – Travel Up – 3 Circles on Handles – 3 Flairs
- 5 Czechs (in a row; circle between if required)
- 3 Stockli B (in & out series)
- 10 Loops between the Handles
- One Handle Circles (minimum x 10)
- Magyar & Sivado (combined if possible)

• RINGS

- (From Hang) Pull & Cast to 2 Swings (fwd & bwd) – Back Uprise to Hstd with Straight Arms – Reverse Giant through Hstd – Reverse Giant to Hstd – Back Giant through Hstd – Bwd Giant to Hstd – Bwd Layout Dismount

• VAULT

- Handspring Front Salto
- Tsukahara stretched
- Yurchenko stretched

• P BARS

- **Basic Sequence:**
 - Kip (through Russian Sit) – Swing to Pivot (fwd) – Swing fwd with maximum amplitude & swing bwd to Hstd – Stutz Hstd (x 2) – Layaway to Front Uprise – Reverse Pivot – Swing fwd with maximum amplitude & swing bwd to Hstd – Bwd Layout Salto Dismount
- Giant (3 in a row)
- Felge (3 in a row)

• H BAR

- **Basic Sequence:**
 - Tap Swing – Bwd Uprise to Hstd – Swing Fwd & Hop to Reverse Grip – Swing Bwd & Hop to Top Grip (preferably with tap) – Swing Fwd & Hop to Reverse Grip – Swing Bwd & Hop to Top Grip (preferably with tap) – Swing $\frac{1}{2}$ turn (x 2; preferably with hop) – Giant – Stalder – Giant – Blind Change – Giant – Endo – Giant – Reverse Giant $\frac{1}{2}$ turn to Reverse Grip (x 2) – Top Change – 2 Giants – Stretched Back Salto Dismount
